

DURAI PANDI

.NET Backend Software Engineer

Chennai, India | +91 8754179662 | erduraipandii@gmail.com | linkedin.com/in/duraipandi

PROFESSIONAL SUMMARY

Backend-focused .NET Software Engineer with around 4 years of experience building, integrating, deploying and maintaining C#/.NET applications and communication platforms. Strong hands-on experience with C#, .NET 8, ASP.NET Core Web API, Entity Framework/EF Core, SQL, REST APIs, third-party API integrations, production troubleshooting and Linux-based deployments. Experience with AWS (including EC2/Lambda), CI/CD exposure, SMTP/email systems and automation. Seeking backend-focused .NET Software Engineer / Senior .NET Developer opportunities.

CORE TECHNICAL SKILLS

Languages & Frameworks: C#, Python, SQL, .NET 8, .NET Core, ASP.NET Core Web API, ASP.NET Web API, REST APIs, OOP

Data Access & Databases: Entity Framework / EF Core, Dapper, LINQ, Microsoft SQL Server, MySQL, Database Design & Query Optimization

Cloud & DevOps: AWS EC2, CI/CD Exposure, Linux Server, IIS, Windows Server, Nginx Exposure, Production Deployment & Automation

Messaging & Integrations: SMTP, MailKit, EASendMail, KEEPA API, Amazon SP-API, Google Sheets API, Third-Party REST API Integration

Engineering Practices: Production Support, Root-Cause Analysis, Debugging, High-Volume Data Processing, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer — Resulticks

Nov 2024 — Present | Chennai, India

Product: RESUL — Customer Engagement & Communication Platform

- Build and maintain C#/.NET-based client communication workflows for high-volume transactional and marketing email/SMS delivery.
- Work with modern .NET application components, REST APIs, database integrations, and production support activities.
- Migrated application mail-sending library from EASendMail to MailKit, directly improving email delivery success rate and sending speed on Linux-hosted production servers.
- Designed and developed SMTP domain automation to streamline domain configuration and eliminate manual setup effort for outbound mail delivery.
- Investigate and resolve client-reported issues and production bugs using root-cause analysis, minimizing disruption to communication delivery and maintaining high system uptime.
- Deploy code changes and application updates directly to Linux production servers, coordinating releases with minimal downtime.

Software Engineer — Agilensmart Technology Solutions Pvt Ltd

Oct 2022 — Oct 2024 | Chennai, India

Products: Amazon Seller Tools — KEEPA Integration, Competitor Intelligence & Bulk Analyzer Tools

- Built C#/.NET automation tools for Amazon FBA and merchant-fulfilled sellers, integrating KEEPA API, Amazon SP-API, and Google Sheets API to automate product research, pricing, and inventory workflows.
- Developed product history tracking module that accepts JSON queries/ASINs from user input, fetches historical data via KEEPA API, and populates Google Sheets for analysis and reporting.
- Built stock and price management functionality integrated with Amazon SP-API to refresh inventory, pricing, and stock status from live product data and monitor competitor listings.
- Generated automated feed files for Amazon Seller Central uploads and developed wholesale bulk analysis software to help sellers identify profitable products across large catalogs.

EDUCATION

B.E. in Computer Science and Engineering — Anna University

April 2022 | CGPA: 7.98
